Pro-Forma for Display of Information on the College Website

GSVM Medical College, Kanpur

S.No.	Information	Details
1	Name	GSVM Medical College
2	Address	Swaroop Nagar, Kanpur - 208002
3	University	ABVMU, Lucknow
4	Website	www.gsvmmedicalcollege.com
5	Dean	Dr. Sanjay Kala
6	Mobile	9839210012
7	Email	gsvm_kmp@yahoo.co.in
8	Hospital	LLR & Associated Hospitals
9	Hospital Registration Date	16 Dec 1944
10	Number of Beds	2320
11	Emergency Beds	209
12	LoP Year	1956
13	Recognition Status	Recognized
14	Seats	MBBS: 250, MD/MS: 168, DM/MCh: 33
15	Inpatients	12296
16	Outpatients	93784
17	Deaths	428
18	Death Records Address	Kanpur Municipal Corporation
19	Death Records Website	www.kmc.up.nic.in
20	Births	578
21	Birth Records Address	Kanpur Municipal Corporation
22	Birth Records Website	www.kmc.up.nic.in
23	Men Hostel	Rooms: 541, Students: 1293
24	Women Hostel	Rooms: 170, Students: 426
25	Grievance Officer	Dr. Richa Giri
26	Address	Vice Principal, GSVM Medical College, Kanpur
27	Contact Email	gsvm_kmp@yahoo.co.in
28	Grievances Reported	86

GSVM Medical College, Kanpur
Current Admitted Status 2025-26

S.No	Speciality	Total Seats	Current Admitted
1	MD Anaesthesia	12	12
2	MS Anatomy	2	2
3	MS ENT	6	6
4	MD Forensic Medicine	1	1
5	MS Obst. & Gynae	21	21
6	MD General Medicine	25	25
7	MS Ophthalmology	5	4
8	MS Orthopedics	9	9
9	MD Pediatrics	14	14
10	MD Pathology	14	14
11	MD Pharmacology	5	5
12	MD Physiology	8	8
13	MD Biochemistry	3	3

21	D.C.H.	2	2

S.No.	Department	PG Seats (NMC)	PG Course Started	Current PG Students	Admitted (Current Session)	Avg. Daily OPD (Prev. Year)	Avg. Daily Bed Occupancy (Prev. Year)	Major Surgeries (Prev. Year)	Minor Surgeries (Prev. Year)	Available Facilities
1	Anaesthesiology, Critical Care & Pain Medicine	14		34	14	20	8	12978	4972	10 bedded AEICU Pain OPD, Pain Ot,PAC clinic Routine and emergency surgeries including dept of Genral Surgery, ENT, Orthopaedics, obgy, Ophthalmology super speciality surgeries including neurosurgery, urology, pediatric surgery, ect. ACLS/BLS, Workshops, Training and teaching of paramedical, nursing and UG mbbs students
3	Anatomy	2	1997	6	2	Not applicable	Not applicable			A well ventilated Dissection hall, cadaveric lab, anthropometry museum, Histology lab with projector and pentacular microscope, aircondioned demonstrationed rooms
4	Biochemistry	03	2025	06	03	00	00	00	00	07
5	Community Medicine	6	1960	14	6					Entomology Lab, Museum, Family Adoption Programme, UHTC, RHTC
6	Critical Care	No Course Started in Department	No Course started yet	Not applicable	Not applicable	Not appicable	Average 5 bed/day, Total IPD admissions- 1672 in ast year	Not Applicable	Tracheostomy-34	Invasive & Non Invasive Ventilation Invasive Hemodynamic Monitoring CRRT & SLED Bedside USG & ECHO
7	Dentistry	0	0	0	0	80.76	0	168	7871	Dental Restorations, RCT Simple and Surgical Extraction, Pedodontic Restorations, Different Orthodontic Removaable Aplliances, Oral and Maxillofacial trauma, Cyst and Tumor Surgery,Oral Prophylaxis, Demonstration of Different Brushing Techniques etc.
8	Dermatology	0		0	0	400	Around 80 percent	0	1905	Electro cautery , Chemical cautery , Skin biopsy , inrtralesional steroid therapy , STI clinic (patients counselling and treatment) , Leprosy clinic (patients counselling and treatment), vitiligo surgery , laser , scar revision , minor
9	ENT	6 per year	PG seat increased from 03 to 06 in 2017	18	6	239	0.85	1034	4837	1.OPD services- routine & specialized clinics like rhinology, otology and vertigo 2.OT SERVICES- routine and advance surgeries like skull base, pitutiary , parathyroids etc. 3. Audiology and diagnostic facilities : department is well equipped with advanced Pure tone audiometer , Impedance audiometer & BERA 4. Academic programmes- 6 post graduate seats per year 5. Paramedical training- 25 seats diploma in audilogy and speech therapy technician course
10	Forensic Medicine	ONE	1999 but got Recognised in year 2011	THREE	ONE	NOT APPLICABLE	Not APPLICABLE	NoT APPLICABLE	NOT APPLICABLE	COMPLETE INFRASTRUCTURE AND FACILITY AVAILABLE FOR ONE P G.SEAT OF M.D. (FORENSIC MEDICINE)
11	General Medicine	25	1960	74	25	155478	27132			Medicine ICU, Emergency, High Dependency Unit (HDU), Hemodialysis, UGI Endoscopy, Lower GI Endoscopy,

S.No.	Department	PG Seats (NMC)	PG Course Started	Current PG Students	Admitted (Current Session)	Avg. Daily OPD (Prev. Year)	Avg. Daily Bed Occupancy (Prev. Year)	Major Surgeries (Prev. Year)	Minor Surgeries (Prev. Year)	Available Facilities
12	Medical Gastroenterology	0	2026 for DrNB Gastroenterology	2 seats of DrNB permitted by DNB board	2	200 patients per day	100 percent	400	1600	30 beds ward 6 beds ICU Two dedicated gastro OT One day care procedure OT Diagnostic and therapeutic Endoscopy ERCP Endoscopic ultrasound Enteroscopy Pediatrics endoscopy Argon plasma coagulation Colonoscopy
13	Microbiology	3	2025	3+3	3	Na	Na	Na	Na	*Available Facilities in the Department of Microbiology For increase PG Seats:* 1. Bacteriology Lab with Automated Systems Like BacT Alert & VITEK-2 as well as routine conventional culture and sensitivity. Catering Around 100 -200 Samples /Day. 2. Virology Including BSL-2 Facility: Regularly Providing Molecular Testing Facility For Detection of H1N1 Influenza, Viral Load Testing and ELISA for Hepatitis B & C, COVID-19 RTPCR & Other Respiratory Viruses. 3. Serology Laboratory: ELISA & Rapid Card Test For Detection of NS1 & IgM/IgG for Dengue, Hepatitis B& C, ASO, VDRL/RPR, Widal, RA Factor, CRP. 4. Mycology: KOH mount , staining and culture for fungal diagnosis 5. Parasitology: Stool microscopy for ova & cyst. Screening of Peripheral blood smear for Filaria 6. Mycobacteriology laboratory: The laboratory performs ZN staining, Liquid culture (MGIT) and Line Probe Assay (1st and 2nd line) under the National Tuberculosis Elimination Program 7. NABL Accredited HIV testing laboratory and Integrated Counselling and Testing Centre which performs testing as well as counselling of HIV-1 and HIV-2 as per UP SACS & NACO guidelines 8. Hospital Infection Control - the laboratory, coordinates with various departments of the hospital for the surveillance of Hospital Acquired Infections. The department also undertakes infection prevention and control training activities for paramedical staff and doctors.

24	Biochemistry	Dr. Prabha Verma	PhD medical biochemistry	2140734	Professor	06/03/2023 professor	Regular/ Permanent	Professor biochemistry	05-Dec-25 Friday 9–10 am BC 3.3 Define and briefly describe the pathways of carbohydrate metabolism and their regulation (glycolysis, gluconeogenesis, TCA, and significance of glycogen metabolism and HMP shunt), with associated disorders. Dr Prabha Verma 11-Dec-25 Thursday 2–3 pm BC 3.3 Define and briefly describe the pathways of carbohydrate metabolism and their regulation (glycolysis, gluconeogenesis, TCA, and significance of glycogen metabolism and HMP shunt), with associated disorders. Flip class Dr Prabha Verma 12-Dec-25 Friday 9–10 am BC 3.3 Define and briefly describe the pathways of carbohydrate metabolism and their regulation (glycolysis, gluconeogenesis, TCA, and significance of glycogen metabolism and HMP shunt), with associated disorders. Dr Prabha Verma 18-Dec-25 Thursday 2–3 pm BC 3.3 Define and briefly describe the pathways of carbohydrate metabolism and their regulation (glycolysis, gluconeogenesis, TCA, and significance of glycogen metabolism and HMP shunt), with associated disorders. Dr Prabha Verma 22-Jan-26 Thursday 2–4 pm BC 4.2 Describe the digestion and absorption of dietary lipids and its associated disorders. BC 4.3 Describe and discuss the fatty acid oxidation, metabolism of ketone bodies along with their clinical significance. Dr Prabha Verma 23-Jan-26 Friday 9–10 am BC 4.4 Describe metabolism of triglycerides and cholesterol metabolism along with its regulation and clinical significance. Dr Prabha Verma ACADEMIC EXPERIENCE (15 years of experience) 01 YEAR EXPERIENCE AS LECTURER (CONTRACTUAL) IN GOVERNMENT MEDICAL COLLEGE ORAI JALOUN FROM 2009 TO 2010 AND HAD A CHARGE OF CAMPUS PRABHARI. IN 2012, UPPSC SELECTED AS LECTURER IN THE DEPARTMENT OF BIOCHEMISTRY IN MAHARANI LUXAMI BAI MEDICAL COLLAGE JHANSI UP. IN APRIL 2013 ATTECHED WITH DIRECTOR GENRAL MEDICAL EDUCATION DEPARTMENT LUCKNOW. PRAMOTED IN 2015 AS ASSISTANT PROFESSOR IN THE DEPARTMENT OF BIOCHEMISTRY IN MAHARANI LUXAMI BAI MEDICAL COLLEGE, JHANSI. PRAMOTED IN 1019 AS ASSOCIATE PROFESSOR, DEPARTMENT OF BIOCHEMISTRY IN MAHARANI LUXAMI BAI MEDICAL COLLEGE, JHANSI. TRANSFER IN 17th JULY 2021 AS ASSOCIATE PROFESSOR, DEPARTMENT OF BIOCHEMISTRY, TO GSVM MEDICAL COLLEGE, KANPUR, U.P. PRAMOTED IN 06th MARCH 2023 AS	Designation Professor, Department of Biochemistry Institution GSVM Medical College, Kanpur Address TF-402, Vidhayak Niwas, Rajendra Nagar, Lucknow – 226004 Mobile +91-9415924237, +91-8467044897 Email drprabhaverma941@gmail.com, prabhabiochem@rediffmail.com Educational Qualifications Degree Year Institution University PhD Medical Biochemistry 2015 CSJM University, Kanpur CSJM University MSc Medical Biochemistry 2006 Bundelkhand University Bundelkhand University BSc (Zoology, Chemistry) 2004 D.V. College Orai Bundelkhand University Intermediate 2001 Annie Besant College UP Board High School 1998 A.C. Maheshwari College UP Board Professional Experience Dr. Prabha Verma has more than 15 years of teaching experience and over 20 years of research experience in the field of Medical Biochemistry. She has served as Lecturer, Assistant Professor, Associate Professor, and currently Professor at GSVM Medical College, Kanpur. She has also worked extensively with DGME Uttar Pradesh as Nodal Officer and contributed to multiple public health programs including COVID-19 laboratory management. Research Profile Dr. Prabha Verma has extensive research expertise in oxidative stress, dyslipidemia, diabetes mellitus, and cancer biomarkers. Her PhD research focused on antioxidant status and dyslipidemia in diabetic rat models, providing valuable insights into metabolic disorders. She has worked in premier institutions including CDRI, CIMAP, NBRI, and KGMU, gaining experience in molecular biology techniques such as PCR, DNA sequencing, and biomarker analysis. Her research has contributed significantly to understanding the biochemical basis of diseases and identifying therapeutic targets. She has published 20 research papers in national and international journals and has guided multiple research projects. Her recent work includes studies on redox homeostasis in cervical cancer, urinary biomarkers, and biochemical correlations in metabolic diseases. She has also worked on medicinal plants like Aloe vera, Piper longum, and Phyllanthus niruri for their hypolipidemic and antioxidant properties. Her contributions extend to clinical biochemistry including studies on serum ferritin, uric acid, and glycosylated hemoglobin. She is also actively involved in interdisciplinary research combining clinical and experimental approaches. Echocardiographic findings in COPD and their correlation to severity of disease: An observational study from North India. J Evolution Med Dent Sci. 2018;7(06):801–806. doi:10.14260/jemds/2018/182. Abstract (Vancouver format): Background: Chronic obstructive pulmonary disease (COPD) is a leading cause of mortality and morbidity worldwide and is increasingly recognized as a multisystem disorder with significant cardiovascular involvement. Echocardiography provides a rapid, non-invasive, and reliable method to evaluate cardiac dysfunction in COPD patients. Materials and Methods: This prospective observational study included 50 randomly selected COPD patients who met inclusion criteria. All patients underwent detailed clinical evaluation, laboratory investigations, chest X-ray, pulmonary function testing (PFT), electrocardiography (ECG), and transthoracic echocardiography to assess pulmonary arterial hypertension (PAH) and cor pulmonale. Results: Among the patients, 84% were males and 16% females, with a mean age of 59.94 ± 10.37 years (range 40–85 years). Most had a history of significant tobacco exposure (20–29 pack-years). Clinical evidence of congestive cardiac failure was present in 36% of patients. Severe airflow obstruction was observed in 60% of cases, while only 4% had mild disease. Echocardiographic findings included: Cor pulmonale: 54% Pulmonary hypertension: 56% Right ventricular (RV) dilatation: 48% RV hypertrophy: 28% RV failure: 14% Left ventricular (LV) systolic dysfunction: 8% Pulmonary hypertension was observed in 68%, 43%, and 25% of severe, moderate, and mild COPD groups, respectively. In the severe group, 73.3% had pulmonary hypertension and 76.7% had cor pulmonale. RV failure was seen only in severe cases (23.3%). LV systolic dysfunction was present in 13.3% of severe COPD patients. Conclusion: Most echocardiographic findings showed a statistically significant correlation with COPD severity ($p < 0.05$), except RV hypertrophy, interventricular wall motion abnormalities, and LV systolic dysfunction. The prevalence of cardiac abnormalities increased with disease severity, highlighting the importance of echocardiographic evaluation in COPD patients. Kumar B, Gautam SK, Anita, Kumar L, Kumar P, Khan MI. Study of CD4 count in pre-ART period and during ART period in seropositive HIV adult patients to see the effect of HAART. J Evolution Med Dent Sci. 2019;8(06):381–384. doi:10.14260/jemds/2019/84. Abstract (Vancouver format): Background: Human immunodeficiency virus (HIV) infection remains a major global health concern, with India having the third-largest HIV epidemic worldwide. The disease imposes a significant socioeconomic burden. Antiretroviral therapy (ART), particularly highly active antiretroviral therapy (HAART), plays a crucial role in improving immune function, as measured by CD4 count. Aims and Objectives: To evaluate CD4 count in the pre-ART period and during ART at intervals of 2 weeks, 4 months, 8 months, 16 months, and 20 months in seropositive adult HIV patients. Materials and Methods: This hospital-based observational cohort study was conducted from December 2015 to July 2017 among 100 adult HIV-positive patients registered at the ART-Plus Centre, GSVM Medical College, Kanpur, Uttar Pradesh, India. Results: Out of 100 patients, 70% were males. The majority belonged to the 20–40 years age group (72%), followed by 40–60 years (17%). HIV infection was more prevalent among married individuals (73%) and predominantly seen in patients from lower socioeconomic status. A higher proportion of cases were from the Hindu community (61%), followed by Muslims (36%). A statistically significant rise in CD4 count was observed during the ART period compared to the pre-ART period across all age groups. The increase in CD4 count was progressive over time, with notable improvement seen as early as 2 weeks after initiation of ART and continuing up to 20 months. The most significant rise in CD4 count occurred between 2 weeks and 4 months, particularly in younger age groups (18–20 years and 20–40 years). Conclusion: ART use in adult HIV patients results in a significant and sustained increase in CD4 count, both in the short term and long term. Early initiation of ART is recommended irrespective of baseline CD4 count or disease staging. Greater emphasis should be placed on prevention, awareness, and management among younger, sexually active populations. Kumar B, Gautam SK, Anita, Kumar L, Kumar P, Khan MI. Study of CD4 count in pre-ART period and during ART period in seropositive HIV adult patients to see the effect of HAART. J Evolution Med Dent Sci. 2019;8(06):381–384. doi:10.14260/jemds/2019/84. Abstract (Vancouver format): Background: Human immunodeficiency virus (HIV) infection remains a major global health concern, with India having the third-largest HIV epidemic worldwide. The disease imposes a significant
