ABOUT US....

This Department is presently run in the premises of old GGH. This presently run by Three Professors, Seven Associate Professors, twelve Assistant Professors and Four Senior Residents and are having Thirty Seven Post Graduates. This Department is presently headed by Dr. P. Himabindu, MS. This Department runs with a mission to provide comprehensive women's health care to improve health outcomes for the diverse population of women we serve in our community.

Complementary to this they are committed to educate the next generation of health care professionals and to participate in evidence based research to ensure patient care continues to evolve in the areas of quality and safety. To this end, a culture of learning and collaboration is present within the department through innovative interdisciplinary relationships.

This team works together to provide outstanding care to the women in our community, to educate tomorrow's leaders in women's health care and to make discoveries that will advance women's health. They always strive to deliver better health and hope to all women and their families through compassionate care, innovation, education and discovery. As you read this issue of our annual publication, you will note the exceptional work and excellence that has been achieved as we translate research from bench to bedside and provide hope to our patients and their families.
