Blood Bank:

The Oxford Medical College and Hospital Blood Bank is an certified blood bank established in 2013, registered with drug controller of India bearing registration number KTK/28C/259/2013 with state-of-art technologies and service.

Our licensed blood bank ensures the critical provisioning of blood that are collected, typed and screened for HIV, HBsAg, HCV, Malaria and Syphilis; for both in-house and outside patients.

We have Special couches to help conduct blood donation. Additionally, we have a dedicated team of qualified and trained professionals who follow stringent screening procedures, careful documentation and Good Laboratory Practices for collecting, processing and testing blood.

Blood donation is a selfless service and an expression of love for mankind. Blood knows no caste, creed, colour, religion or race.

We have now expanded now the Blood Bank by adding facilities to accommodate Blood Components, which include Packed Cells, Platelet, Concentrates, Fresh Frozen Plasma and Cryoprecipitates. In other words one blood bag can be separated into 4 Components and so can save 04 patients.

This will facilitate better healthcare in certain medical conditions like congestive cardiac failure, Dengue fever and Hemophilia to name a few.

Our component separation unit has sophisticated instruments like Deep Freezer for safe storage of blood components, laminar airflow bench to ensure the safety precautions. Platelet agitator and cryobata adds to the state of the art technology.

Our primary goal is to provide the right component to the right patients at right time at an affordable cost.
