About the department

The Department of Anaesthesiology provides perioperative, critical care and pain management services across all surgical specialties. The department staffs the hospital's modular operation theatres 24 hours a day and manages the Surgical ICU, supporting a high volume of emergency and elective procedures. It also provides obstetric anaesthesia and labour epidural analgesia services. DNB seats in Anaesthesiology are offered at PCSGMCH.

Services & teaching

- General, regional and neuraxial (spinal/epidural) anaesthesia
- Obstetric anaesthesia and labour epidural analgesia
- Post-operative acute pain management
- Surgical ICU critical care management
- Pre-anaesthesia evaluation and optimisation
- MBBS Phase III anaesthesia posting and DNB / MD (Anaesthesiology) postgraduate training

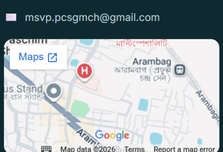

Facilities

- Multiple modular operation theatres with modern anaesthesia workstations
- Surgical Intensive Care Unit (SICU) with ventilators and monitoring
- Pre-anaesthesia assessment and risk stratification clinic
- Difficult airway trolley with fibreoptic bronchoscope and video laryngoscope
- Acute and chronic pain management clinic
- Regional anaesthesia simulation and nerve block training kit

About the department

The Department of Anatomy provides the foundational understanding of the structure of the human body through integrated teaching of gross anatomy, histology, embryology and neuroanatomy. Using cadaveric dissection, osteology, histology practicals and digital resources, students develop a three-dimensional appreciation of human morphology that underpins all clinical disciplines.

Services & teaching

- MBBS Phase I gross anatomy, histology, embryology and neuroanatomy teaching
- Cadaveric dissection practicals and osteology demonstrations
- Surface anatomy and clinical anatomy sessions
- Interdepartmental anatomy support for surgical specialties
- Research guidance in morphological and clinical anatomy

Facilities

- Cadaveric dissection hall (10 dissection tables)
- Histology and microscopy laboratory
- Anatomy museum with osteology specimens, plastinated models and embryology charts
- Embryology specimen collection
- Digital anatomy teaching station
- Osteology room with complete skeletal sets

About the department

The Department of Biochemistry introduces MBBS students to the molecular basis of life — metabolism, enzyme kinetics, molecular biology, genetics and nutrition. The department bridges pre-clinical and clinical medicine through clinically oriented biochemistry, covering topics such as diabetic biochemistry, liver function, kidney function and inborn errors of metabolism. Practical sessions involve biochemical estimation and diagnostic lab techniques.

About the department

The Department of Community Medicine (Preventive and Social Medicine) focuses on population-level health, epidemiology, biostatistics, health administration and public health. Students gain field experience through the Urban Health Training Centre and rural postings, learning to address the health needs of the 30 lakh+ population served by the hospital's catchment area. The department actively participates in national health programmes and community outreach.

Services & teaching

- MBBS Phase II/III community medicine theory and field teaching
- Urban Health Training Centre (UHTC) clinical postings
- Rural health centre postings and camp coordination
- National health programme support (RNTCP, NVBDCP, NPCB, NCD cell)
- Epidemiological surveys and disease outbreak investigation
- Health education, IEC activities and community outreach

Facilities

- Department museum with public health charts, models and national programme posters
- Biostatistics and epidemiology teaching laboratory
- Urban Health Training Centre (UHTC)
- Rural field posting coordination unit
- Health education and IEC material library
- Nutrition demonstration kitchen

About the department

The Department of Dermatology, Venereology and Leprosy (DVL) diagnoses and manages skin, hair, nail and sexually transmitted diseases, with a special focus on leprosy — still prevalent in parts of Hooghly district. The department runs dedicated leprosy and STI clinics, phototherapy services and skin surgery, alongside MBBS and postgraduate training.

Services & teaching

- Diagnosis and management of common and complex skin disorders
- Leprosy — detection, multi-drug therapy (MDT) and disability prevention
- STI screening, treatment and contact tracing
- Skin biopsy, excision of skin lesions, cryotherapy and electrosurgery
- Phototherapy (NB-UVB) for psoriasis and vitiligo
- MBBS Phase III DVL teaching and MD (DVL) postgraduate training

Facilities

- Dermatology OPD with dermatoscopy unit and Wood's lamp
- Skin biopsy and minor operation room
- Leprosy assessment, disability grading and MDT clinic
- STI / venereology clinic with private counselling room
- Narrowband UVB phototherapy unit
- Patch test panel for contact dermatitis evaluation

About the department

The Department of Ear, Nose and Throat (Otorhinolaryngology — Head and Neck Surgery) provides diagnostic and surgical care for diseases of the ear, nose, paranasal sinuses, throat, larynx and neck. The department undertakes microsurgical ear procedures, endoscopic nasal and sinus surgery, and management of head and neck conditions, alongside MBBS and postgraduate training.

Services & teaching

- Diagnosis and surgical management of chronic otitis media (CSOM)
- Functional endoscopic sinus surgery (FESS) for nasal polyposis and sinusitis
- Tonsillectomy, adenoidectomy and throat surgery
- Tracheostomy and emergency airway management
- Audiometry, tympanometry and hearing aid evaluation
- MBBS Phase III ENT teaching and MS (ENT) postgraduate training

Facilities

- ENT OPD with diagnostic endoscopy and nasal endoscopy suite
- Audiometry and hearing assessment unit (pure-tone audiometry, tympanometry)
- ENT operation theatre with operating microscope and Karl Storz endoscopy set
- FESS (functional endoscopic sinus surgery) instrumentation
- Microlaryngoscopy and bronchoscopy set
- Speech therapy and audiological rehabilitation room

About the department

The Department of Forensic Medicine and Toxicology (FMT) educates students in the medical, legal and ethical dimensions of clinical practice. It covers forensic pathology, toxicology, clinical forensic medicine, and medical jurisprudence. The department assists judicial and police authorities through medico-legal examinations, post-mortem services and expert witness testimony.

Services & teaching

- Post-mortem examination and medico-legal autopsy
- Medico-legal examination of living persons (assault, sexual offences, drunkenness)
- Toxicological analysis and poison case management support
- Issue of medico-legal certificates, MLC and injury reports
- MBBS Phase II/III FMT theory teaching and practical demonstrations
- Expert witness preparation and court liaison services

Facilities

- Mortuary with post-mortem facility (4 autopsy tables)
- Toxicology analytical laboratory
- Medico-legal examination room with documentation facility
- Forensic museum with evidence specimens and injury pattern charts
- Photography and documentation facility
- Library of medico-legal literature and case law

About the department

The Department of General Medicine is the largest clinical department at PCSGMCH, providing comprehensive inpatient and outpatient care for a wide spectrum of adult illnesses. It serves as the primary teaching unit for MBBS Phase III students, covering cardiology, endocrinology, gastroenterology, neurology, nephrology and infectious diseases. The department manages a high volume of tropical and non-communicable diseases prevalent in the Hooghly district.

Services & teaching

- 24×7 inpatient management of acute and chronic adult illnesses
- General Medicine OPD — Monday to Saturday, 8 AM – 1 PM
- Diabetes, hypertension and metabolic syndrome clinic
- Neurology and stroke assessment
- Infectious disease management — tuberculosis, malaria, dengue, enteric fever
- MBBS Phase III and MD (Medicine) postgraduate training

Facilities

- Male and female general medicine wards
- High Dependency Unit (HDU) with cardiac monitoring
- Dedicated diabetic and hypertension OPD clinic
- Neurology assessment bay with EEG access
- Bedside ultrasound and 12-lead ECG facility
- Postgraduate seminar and clinical skill training room

About the department

The Department of General Surgery handles a high volume of emergency and elective surgical procedures, serving the rural and semi-urban population of Arambagh and surrounding districts. The department covers gastrointestinal surgery, trauma, laparoscopic procedures, urology, breast and thyroid surgery. It provides extensive surgical training to MBBS and postgraduate students through OT postings, ward rounds and skills workshops.

Services & teaching

- Emergency and elective laparotomy and laparoscopic surgery
- Trauma surgery, wound management and burn care
- Gastrointestinal, breast and thyroid surgery
- Hernia, anorectal and proctological procedures
- Urological procedures (cystoscopy, TURP support)
- MBBS Phase III surgical training and MS (Surgery) postgraduate teaching

Facilities

- Dedicated male and female surgical wards
- Modular operation theatres with laparoscopic stack and HD camera
- Surgical ICU / HDU with ventilator support
- Fibreoptic endoscopy suite (upper GI and lower GI)
- Pre-operative and post-operative care unit
- Trauma bay with emergency surgical access and ATLS setup

About the department

The Department of Microbiology provides comprehensive teaching in bacteriology, virology, parasitology, mycology and immunology. The department operates a clinical diagnostic microbiology laboratory that supports the hospital's infection control programme, antimicrobial stewardship and management of infectious diseases. Students gain hands-on experience in culture techniques, serology and microscopy.

Services & teaching

- Culture and antibiotic sensitivity testing (blood, urine, pus, CSF, sputum)
- Serological diagnosis of infectious diseases (HIV, HBsAg, VDRL, Widal, Dengue NS1)
- Parasitological examination (stool, blood smear for malaria)
- Hospital infection control committee coordination
- MBBS Phase II microbiology teaching and practicals
- Antimicrobial stewardship programme support

Facilities

- Bacteriology culture and sensitivity laboratory (aerobic and anaerobic)
- Serology and immunology section (ELISA, Widal, VDRL)
- Mycology and parasitology laboratory
- Biosafety cabinet Class II for containment procedures
- Autoclave and sterilisation unit
- Teaching museum with microbiology specimens and charts

About the department

The Department of Obstetrics and Gynaecology provides comprehensive maternal and reproductive healthcare to women from Arambagh and the wider Hooghly district. The department manages high-risk pregnancies, conducts institutional deliveries, handles obstetric emergencies and offers gynaecological surgical services. It is a key teaching unit for MBBS Phase III students and MD/MS residents. DNB seats in Obstetrics & Gynaecology are offered at PCSGMCH.

Services & teaching

- Antenatal, intranatal and postnatal care
- Normal and operative (LSCS) institutional deliveries
- Management of high-risk pregnancies and obstetric emergencies
- Gynaecological surgeries including laparoscopy and hysterectomy
- Family planning — IUCD insertion, laparoscopic sterilisation
- Cervical cancer screening and colposcopy clinic

Facilities

- Labour room with cardiotocography (CTG) and fetal monitoring
- Dedicated obstetric operation theatre
- Antenatal and postnatal wards
- Gynaecology ward and day-care surgical unit
- Colposcopy and LEEP facility for cervical lesions
- Ultrasonography unit (obstetric and gynaecological, including anomaly scan)

About the department

The Department of Ophthalmology provides comprehensive eye care services including cataract surgery, glaucoma management, retinal evaluation and low-vision rehabilitation. The department conducts outreach eye camps for rural communities and participates in the National Programme for Control of Blindness (NPCB), while training MBBS Phase III students and postgraduate candidates. DNB seats in Ophthalmology are offered at PCSGMCH.

Services & teaching

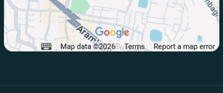

- Cataract surgery — phacoemulsification and SICS / ECCE
- Glaucoma management including laser trabeculoplasty
- Retinal evaluation, laser photocoagulation and intravitreal injections
- Squint correction and paediatric ophthalmology
- Outreach eye camps and National Blindness Control Programme
- MBBS Phase III ophthalmology teaching and DOMS/MS postgraduate training

Facilities

- Ophthalmic OPD with slit-lamp biomicroscopes and refraction units
- Cataract and vitreoretinal operation theatre
- Phacoemulsification and SICS surgical setup
- Retinal examination suite (indirect ophthalmoscope, fundus camera)
- Glaucoma clinic with Goldmann applanation tonometry
- Low-vision clinic and orthoptic assessment unit

About the department

The Department of Orthopaedics manages a wide spectrum of musculoskeletal trauma and elective orthopaedic conditions, catering to the high burden of road traffic accidents, agricultural injuries and degenerative joint disease in Arambagh and surrounding districts. Services include fracture fixation, joint replacement, arthroscopy, spine surgery and comprehensive rehabilitation.

Services & teaching

- Emergency fracture fixation and trauma management
- Open reduction and internal fixation (ORIF) — plate, nail and screw systems
- Total knee replacement (TKR) and total hip replacement (THR)
- Arthroscopic knee, shoulder and ankle procedures
- Spine surgery — discectomy, laminectomy and fusion
- MBBS Phase III orthopaedic teaching and MS (Orthopaedics) postgraduate training

Facilities

- Orthopaedic wards (male and female)
- Operation theatre with C-arm image intensifier fluoroscopy
- Fracture and plaster room (POP and synthetic casting)
- Physiotherapy and musculoskeletal rehabilitation unit
- Spine evaluation and traction bay
- Arthroscopy tower and equipment set

About the department

The Department of Paediatrics provides curative, preventive and developmental health services for children from birth to 18 years. It manages neonatal and childhood illnesses, nutritional disorders, vaccine-preventable diseases and paediatric emergencies. The department operates a Sick Newborn Care Unit (SNCU) and NICU, and participates actively in national child health and immunisation programmes. DNB seats in Paediatrics are offered at PCSGMCH.

Services & teaching

- Neonatal resuscitation and management of sick newborns (SNCU/NICU)
- Inpatient management of paediatric illnesses
- Paediatric OPD — general and specialty clinics
- Immunisation clinic — routine EPI and catch-up vaccination
- Management of SAM / nutritional rehabilitation
- MBBS Phase III paediatric training and MD (Paediatrics) postgraduate teaching

Facilities

- Paediatric general ward (male and female)
- Sick Newborn Care Unit (SNCU) with radiant warmers and phototherapy units
- Neonatal Intensive Care Unit (NICU) with CPAP and ventilator support
- Paediatric emergency and resuscitation bay
- Nutritional rehabilitation unit
- Immunisation and child welfare (well-baby) clinic

About the department

The Department of Pathology serves both as a major teaching department and a vital clinical diagnostic service. It provides expertise in histopathology, cytopathology, haematology, clinical pathology and transfusion medicine, supporting patient care across the 594-bed teaching hospital. The department imparts in-depth pathological knowledge to MBBS and postgraduate students through case-based learning, museum demonstrations and advanced diagnostic techniques.

Services & teaching

- Histopathology reporting — biopsies, surgical specimens, intraoperative frozen sections
- Cytology services including FNAC and Pap smear
- Haematology — CBC, peripheral smear, bone marrow aspiration and biopsy
- Clinical pathology — urine routine, stool examination, body fluid analysis
- Blood bank and transfusion medicine services
- MBBS Phase II/III pathology teaching and PG training

Facilities

- Histopathology laboratory with cryostat and automated tissue processor
- Cytopathology section (FNAC and gynaecological cytology)
- Haematology analyser and bone marrow examination facility
- Clinical pathology laboratory (urine, stool, body fluids)
- Departmental museum with gross and microscopic specimens
- Multi-head teaching microscopes for batch demonstrations

About the department

The Department of Pharmacology teaches the principles of drug action, pharmacokinetics, pharmacodynamics and rational therapeutics to MBBS students. The department coordinates the college's Pharmacovigilance Programme of India (PvPI), promoting safe medication practices and adverse drug reaction reporting across the hospital. Problem-based learning and prescription audits are integrated into the curriculum.

Services & teaching

- MBBS Phase II pharmacology theory and practical teaching
- Rational drug use and prescription writing workshops
- Pharmacovigilance and adverse drug reaction (ADR) reporting (PvPI)
- Drug information services to clinical departments
- Prescription audit and antimicrobial stewardship support
- Therapeutics committee participation

Facilities

- Pharmacology experimental laboratory with organ bath apparatus
- Isolated tissue preparation and kymograph setup
- Computer-aided pharmacology simulation software
- Drug information centre
- Pharmacovigilance reporting cell (PvPI ADR centre)
- Audiovisual teaching aids, drug model kits and prescription worksheets

About the department

The Department of Physical Medicine and Rehabilitation (PMR) provides assessment and comprehensive rehabilitation services for patients with physical disabilities arising from neurological injuries, musculoskeletal conditions, stroke, spinal cord injury, cerebral palsy and post-surgical conditions. The department adopts a multidisciplinary approach integrating physiotherapy, occupational therapy, speech therapy and prosthetics.

Services & teaching

- Neurorehabilitation — post-stroke, traumatic brain injury, spinal cord injury
- Post-surgical and post-fracture physiotherapy
- Cerebral palsy and paediatric developmental rehabilitation
- Prosthetics, orthotics and assistive device assessment and provision
- Pain management — back pain, neck pain, sports injuries
- MBBS Phase III PMR posting and MD (PMR) postgraduate training

Facilities

- Physiotherapy gymnasium with strengthening and conditioning equipment
- Electrotherapy units (IFT, TENS, therapeutic ultrasound, short-wave diathermy)
- Occupational therapy workshop
- Hydrotherapy pool
- Prosthetics and orthotics fitting and fabrication area
- Gait analysis room and disability assessment bay

About the department

The Department of Physiology teaches the functional mechanisms of the human body — from cellular biophysics to integrated organ-system physiology. The curriculum covers cardiovascular, respiratory, renal, endocrine, reproductive, neurophysiology and haematology. Practical sessions use physiological recording instruments, haematological techniques and clinical skills demonstration to bridge theory and clinical practice.

Services & teaching

- MBBS Phase I physiology theory, practical and clinical demonstration teaching
- Haematological investigations (PCV, haemoglobin, blood group, clotting time)
- Cardiovascular and respiratory physiology practicals
- Spirometry and lung function demonstrations
- Research methodology and biostatistics support

Facilities

- Physiology experimental laboratory with polygraph/power lab
- Haematology practical section
- Clinical physiology demonstration room
- Amphibian and mammalian experimental preparation setup
- Computer-based physiological simulation software
- Audiovisual teaching aids and charts library

About the department

The Department of Psychiatry provides evidence-based mental health services to the largely underserved population of Arambagh and surrounding districts. It manages mood disorders, psychosis, substance use disorders, anxiety disorders and provides liaison psychiatry services to other departments. The department advocates for destigmatisation of mental illness through community outreach and public education.

Services & teaching

- Inpatient and outpatient management of psychiatric disorders (schizophrenia, bipolar, depression, OCD)
- De-addiction services — alcohol, opioid and poly-substance use
- Electroconvulsive therapy (ECT) with full monitoring
- Child and adolescent mental health services
- Liaison psychiatry across all clinical departments
- MBBS Phase III psychiatry teaching and MD (Psychiatry) postgraduate training

Facilities

- Psychiatry OPD with private consultation rooms
- Psychiatric inpatient ward (male and female sections)
- De-addiction and substance use disorder clinic
- Electroconvulsive therapy (ECT) suite with anaesthesia support
- Psychological testing and counselling room
- Liaison psychiatry consultation service

Services & teaching

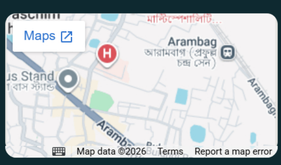

- Plain radiography — chest, abdomen, musculoskeletal
- CT scan — head, chest, abdomen, spine, CT angiography
- Ultrasonography — abdominal, obstetric, thyroid, small parts, Doppler
- Mammography and breast imaging
- Ultrasound-guided interventions — FNAC, drainage, biopsy
- MBBS Phase III radiology postings and MD (Radio-Diagnosis) PG training

Facilities

- Digital X-ray units — general OPD and emergency
- Multi-slice helical CT scan with contrast injection facility
- Ultrasound and colour Doppler units (multiple rooms)
- Mammography unit
- Fluoroscopy and contrast study (barium) room
- Picture Archiving and Communication System (PACS) with digital reporting

About the department

The Department of Radiotherapy (Radiation Oncology) provides radiation treatment planning and delivery for cancer patients referred from across the Hooghly, Bankura and Burdwan districts. The department offers external beam radiotherapy, brachytherapy and palliative radiation services, and collaborates with surgical and medical oncology in a multidisciplinary tumour board setting.

Services & teaching

- External beam radiotherapy — conventional, 3D-CRT, IMRT
- HDR brachytherapy — cervical and other gynaecological malignancies
- Palliative radiotherapy for bone metastases and brain secondaries
- Multidisciplinary tumour board (MDT) participation
- Follow-up and survivorship care for cancer patients
- MBBS Phase III oncology posting and MD (Radiotherapy) PG training

Facilities

- Linear Accelerator (LINAC) unit for external beam radiotherapy
- High dose rate (HDR) brachytherapy facility
- 3D radiation treatment planning system (TPS)
- CT-simulation suite for treatment planning
- Radiation physics and dosimetry quality assurance laboratory
- Shielded radiotherapy bunker with safety interlocks

About the department

The Department of Respiratory Medicine (Pulmonology) manages diseases of the lungs and airways including tuberculosis, chronic obstructive pulmonary disease, bronchial asthma, interstitial lung diseases and sleep-disordered breathing. Given the high TB burden in West Bengal, the department runs an active DOTS centre and coordinates with the district Revised National TB Control Programme (RNTCP/NTP).

Services & teaching

- Diagnosis and management of tuberculosis under DOTS (RNTCP/NTP)
- Management of COPD, asthma and obstructive airways disease
- Interstitial lung disease (ILD) evaluation and management
- Flexible bronchoscopy and BAL for diagnosis
- Pulmonary function testing and respiratory physiology
- MBBS Phase III respiratory medicine posting and MD (Resp. Medicine) PG training

Facilities

- Pulmonology OPD with dedicated TB and asthma clinics
- Respiratory medicine inpatient ward
- Pulmonary function testing (spirometry, FeNO measurement) lab
- Bronchoscopy and bronchoalveolar lavage (BAL) suite
- DOTS centre for tuberculosis (RNTCP-designated)
- Non-invasive ventilation (BiPAP / CPAP) unit
